Abdulaziz Al Jouf

Biography

(500 words)

Abdulaziz Fahad Al Jouf is a Saudi entrepreneur and the Founder and CEO of PayTabs, a ground-breaking payment processing company which he started in Saudi Arabia in January 2014. Abdulaziz started PayTabs having already gained considerable experience in setting up other e-commerce companies, including SaleTab and Extabs.

Known to his staff as AA, he is a dynamic, passionate, focused and a hands-on natural leader who is fiercely supportive of his team and their personal growth and development. He believes in giving back and he does so by tirelessly mentoring the region's young entrepreneurs. He is a self-confessed risk-taker, always open to opportunities as they arise and making the most of them. He recognises failure not as a failing but as a lesson from which to gain invaluable experience.

Abdulaziz started work in 1999 with the oil giant Saudi Aramco where he acquired Microsoft MCP, MCA, MCSE, MCSE +S and Cisco Networking Engineering Admin CNA. He moved to the USA at the turn of the millennium where he gained a BSc in IT from the University of Nebraska at Omaha, an ECE & E from the University of Missouri-Kansas City. He later went on to try an MBA from the New York Institute of Technology.

PayTabs was conceived when Abdulaziz faced problems in finding a suitable payments gateway for one of his own business startups. When he couldn't find one to meet his needs he typically decided to set one up himself, figuring that there would be many others with the same issues -- SME owners in the MENA region needing access to a payments platform tailored to their requirements. He was right and soon his creation caught the attention of the oil giant Saudi Aramco and PayTabs was taken under the wing of its entrepreneurship scheme 'Wa'ed'.

Abdulaziz has created one of the most exciting and successful new e-commerce businesses in the MENA region. So successful, indeed, that he raised a \$20 million investment in 2016 to support PayTabs' expansion in the Middle East and other countries in Asia.

Abdulaziz and PayTabs have been regularly lauded by their peers both in the region and internationally. Just recently, PayTabs emerged as one of the top 10 funded startups in the Middle East while in 2019, it was ranked number one on the top 20 Fintech Startups list, by Forbes Middle East

In 2018, Abdulaziz figured on the cover of *Arabian Business* and PayTabs was awarded the title of 'Fintech Company of the Middle East' at the prestigious *Arabian Business* Achievement Awards.

Both PayTabs and Abdulaziz have also been featured in leading magazines including *Forbes Middle East* and *Entrepreneur* and in interviews with international media organisations such as *Bloomberg*, *Reuters*, *Sky Arabia*, *CNBC* and *CNN Arabic*.

Abdulaziz Al Jouf

Biography

(100+ words)

Abdulaziz Fahad Al Jouf is a US-educated, Saudi entrepreneur and the dynamic Founder and CEO of PayTabs, MENA's ground-breaking payment processing powerhouse.

Over the years, Abdulaziz and PayTabs have received many accolades and awards for outstanding achievements in the field of fintech. Abdulaziz figured on the cover of Arabian Business and was featured in a cover interview in 2018. He was conferred with a CEO Excellence Award in Riyadh in April 2019. Most recently, PayTabs emerged as one of the top funded startups in the region. He is a regular commentator on international media organizations, including Bloomberg, Reuters, Sky Arabia, CNBC and CNN Arabic.

In addition to being a serial entrepreneur and self-confessed risk taker, AA (as he is fondly known) is a book worm, a fitness enthusiast, a globe trotter and just fun to have coffee with.
